

CS 465P/565 – Fall 2019

Full Stack Web Development

Assignment 2 - CSS

- ❑ In your repo for in-class assignments, create a **separate folder for assignment #2**.
- ❑ Make a copy of last week's **exercise1.html** and style the elements according to the final look below. You can write your CSS code within `<style>` tags within your `.html` file or you can create an **exercise1.css** file and link to it.
 - ❑ Center your form in the middle of your webpage and use a linear gradient as the background.
 - ❑ The colors in this example are `rgb(10,180,10)` and `rgb(250,250,20)` and the font is Helvetica.
 - ❑ Whenever the user hovers or focuses on a button, change the appearance of the element that is being hovered or focused on.

A contact form titled "CONTACT US" is displayed on a background with a green-to-yellow gradient. The form is a white rectangle with a thin grey border. It contains three input fields: a "Name" field, an "Email" field, and a larger text area for a message. At the bottom of the form are two dark blue buttons labeled "SUBMIT" and "RESET".

A contact form titled "CONTACT US" is displayed on a background with a green-to-yellow gradient. The form is a white rectangle with a thin grey border. It contains three input fields: a "Name" field, an "Email" field, and a larger text area for a message. At the bottom of the form are two buttons: a green "SUBMIT" button and a dark blue "RESET" button.

- ❑ Make a copy of last week's **exercise2.html** and style the elements to loosely match the website you selected. You can write your CSS code within `<style>` tags within your .html file or you can create an **exercise2.css** file and link to it.
 - ❑ if you worked with a big website for assignment #1, you can write up to 200 lines of code for this exercise

- ❑ Make a copy of last week's **exercise3.html** and start styling the elements on your webpage. Again, you can write your CSS code within <style> tags within your .html file or you can create an **exercise3.css** file and link to it.
 - ❑ you may choose to spend as much time as you want on this exercise, but you only need up to 200 lines of code
- ❑ Push all your code to your GitHub remote repo. Submit all in-class assignments during week 9.
